est the loyal States: We hereby propose that the authorities of the different States shall at once dedare that the Confederate uniform be henceforth the garb of all convicts sentenced to the State Penitentaries for ordinary crimes, and that the uniform worn pfederate officers be that for crimials of higher grade, according to degree. Thus: s cut-throat or murderer should be a Lientenant General in crime; arson, Msj. Gen.; pickpockets, thieves, confilence men, might be Brigadiers, etc. As the rebellion was the greatest of crimes, so should the insignia in which its actors arrayed themselves be used in all times hereafter by which to designate

the greatest criminals. Besides, it is already a crime to appear is Confederate uniform. As a matter of economy, therefore, as it cannot be worn, shy not have it turned over to the different States, to be used as above indicated? Who seconds the proposition?

AN OCTRAGE. - On Sunday last, Col. Maynadier, of the 6th U. S. Volunteers, commanding dress parade at the Fort, ordered the colored troops, who were forming upon the parade ground, to go d if I wouldn't rather be dismissed from the service, than go on parade by the side of niggers;" or words to that effect. That is very big talk for a man who is under oath to obey the army regulations. The colored troops are subjected to the same discipline as white soldiers, and are entitled to the same rights. We should think an officer would give the matter a second thought, before giving ulterence to such an order, or expressing SOL. MILLER, Editor and Publisher. himself in such language.

Negro troops are at par just now, and pro-slaveryism is below .- Conservative.

The London Times calls upon President Johnson to resign, "because the people have no confidence in him." The people respond to this insult by subscribing for thirty millions and a half of the popular Government loan in a single day.

Owner Wanted.

O's Friday morning, June 2d, the subscri-ber found, tied under a steep bank, near the mouth of Squaw Creek, a short distance we White Cloud, a bay horse which had a mutty been swam across the river the night size, and placed there to await a favorable contunity for the thief to take him away. The horse is about twelve years old, about fif ten and a half hands high, with a little white on the right hind foot, and the right fore hoof sit. There is a dim brand, resembling a C, on the hip. The horse has been left in care of J. C. Pierce, in White Cloud, who will work him for his keeping, until called for. The omer, by proving property and paying necesery charges, can take him away.

J. A. PICKETT.

PIANO-FORTES.

DRIGGS' NEW PATENT.

RE THE ONLY INSTRUMENTS constructed on a truly scientific principle. They have greater strength, and will remain lager in Tune than any other Piano. The construction is simple and natural; all the extraceous lumber in the body of the instrument is dispensed with; the sound-boards are merely arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong fron frame, which is separated and entirely independent of the case, thereby dispensing with the old harp form of stringing, by substituting straight bridges, preserving at the ame time the Over Strung Bass, of which Mr. Duois is the Inventor. By these improvenests we gain much more vibratory power, at the same time preserving all its purity and

They have received the highest testimonials few the Press, and all the principal Artists in he country, among whom are:

HART SANDERSON, L. M. GOTTSCHALK, Est MARETZER, S. THALBERG, MODORE EISFIELD. WM. MASON. BREAN WOLLENHAUPT A. BARILI, FLINCIS H. BROWN. M. STRACKOSCH, WE HENRY FRY, CHAS. FRADEL.

tays:-"I have examined your new Piano ferie, and I cordially approve of its system of construction-its principle, by which great increase of vibratory power is obtained, being very simple and perfectly philosophical. The lone is grand and noble; it has great capacity for sustaining the sound of sipging, and its excelled in depth, purity, and sympathetic

Mr SEGERMUND THALBERG, the great pinnist,

Wm. HENRY FAY, late Musical Critic of the N. Y. Tribune, says:-" I have examined your newly invented Piano Fortes. They merit all TURNER, FRAZER & WILLIAMS, the praise given to them by Messrs. Thalberg, Gottschalk, Strackosch, Mason, and others. As regards structure, they are original and philosophical; in purity, volume, and continuiphilosophical; in purity, volume, and continuity of tone; in vocal versimilitude, that crowning excellence which enables the pianist to aing on the instrument, your Pianos ever de FOREIGN AND DOMESTIC LIQUORS terre the highest rank. Your invention, in er opinion, is destined to work radical changes in the manufacture of Pianos throughout the world."

From the N. Y. Herald. Sept. 5 .- "Upon a terful examination of Driggs' Piano-Forte, we fed the results obtained are a very fine singing he entire instrument, not often found in Pialess constructed upon the old plan."

The N. Y. Times, July 12, says:-"We have low an instrument without an equal. It can ing with a smooth delicacy, perfectly unatsinable on any other instrument; an ordinary player obtains, with no exertion, the fullness da Grand Piano Forte, and they must speedisupersede the old styles."

GENTLEMEN:-Having thoroughly examined ad tested the Piano-Fortes invented and patested by Mr. S. B. Driggs, I am of the opinion that the tone resulting from his improvements, semibited in the instruments under examintion, in point of richness, depth and brillian-7, equals that of the best Grand Piano-Fortes, and excels them in pure, musical intonation and secol tone and power, thus approximating cloter to what I consider perfection in the instrunent than has yet been achieved by any other system of manufacture.

Yours, respectfully, L. M. GOTTSCHALK.

J. D. WEST & Co.: J. D. WEST & Co.:

We are pleased to state that the Pumps we had of you, about a year ago, have been in constant use, 12 hours each day, and raise for the use of our Woolen Factory, about 130 gallons per minute. They work with but little power, compared with pumps we lave used before, and do not get out of repair, and are satisfactory in all respects. Yours, &c.,

DUNLAY MANUFACTURING COMPANY.

SOLON ROBINSON to the Farmer's Club, Jan. 23: "No farmer who owns a well or cistern can possibly afford to be without an iron pump. It should be at once a suction and force pump—a perfect little fire engine—such a one known as 'West's Improved Pump.' I speak of this pump because I happen to know it ... to be very simple, durable, powerful and cheap, and it don't freeze up, nor get out of order once a year . . . I know this, and think I may be doing the farmers good by speaking of it. . . . A boy 10 years old can work it, and throw a continuous inch-and-a-quarter stream. . . . It can be made to work in deep wells as well as in shal-low ones."

[From the New York Observer.] We have had in use for months past one of West's Pumps, which has given us more sat-isfaction as a force and lifting pump than any we have ever used. It is one of great power, and well adapted for ship's decks, mines, facand well adapted for ship's decks, mines, fac-tories, green houses, graperies, &c., &c. The Mining Chronicle and Railway Journal says:

It is recommended for its extreme simplicity of construction, groat strength, and consequent durability and cheapness of repair.—
There is no stuffing box—the pressure being held by a cup packing, like that upon the working piston, working in a cytinder, fitted for the purpose within the upper air chamber—which we think a great improvement, as stuffing is so liable to be deranged, and leak under strong pressure, to say nothing of the loss by friction incident thereto. It has also two air-chambers: thus the action of the valve is cushioned upon both sides by air—preventing water-hammer and vacum-thump. The valves are very accessible, and simply and cheaply repaired. They work much easier than any pump we have ever seen; the 4 inch cylinder It is recommended for its extreme simplicity pump we have ever seen; the 4 inch cylinder being worked by children in wells 100 feet deep, and as they are extremely cheap as well as simple and strong, we freely recommend them.

Gr. NECK, L. I., 1860. I have used this pump for one summer and winter, exposed to the North-West wind coming over Long Island Sound, being the coldest possible exposure, and at no time did it freeze, nor were we unable at any time to pump water with great ease.

H. B. Mollvain.

She undersigned, having to use "West's Im-

proved Pumps," cheerfully recommend them as simple, durable and powerful in raising and throwing water, and for their ease of action, security against frost, and low price, we believe them superior to all others.

WARREN LELAND, Met. Hotel, New York.

J. W POMEROY, Yonkers, N. Y.

DOMINICE LAWRENCE, Westchester. CAMBRIDGE MINE, N. C., June 15, 1863. D. WEST & Co.: Gents-The pump which I ordered for our Mine is received and put to work in our un-derlay shaft, which we are sinking, We find that one man will with ease lift 50 gallons per that one man will with ease lift 50 gallons per minute. We lifted in three and a half hours all the water in the shaft, which measures seven by twelve feet and 30 feet deep, and it was full when we commenced. It answers our ex-

pectations in every respect, and our workmen are highly pleased with it. It will do great service with but trifling expense for repairs.

Yours, respectfully,

Burn Riccins. We have plenty more such certificates, but think these are enough. For Pumps, Hose, Pipe, &c., address or call upon J. D. WEST & CO., 179 Broadway, N. Y.
